

## **EXCHANGE TO CANADA AND USA SEPTEMBER 2011**

Three weeks of fun and friendship has left our group of 18 with some great memories.

The everlasting impression of Canada is the mountains covered in very tall Fur and Spruce trees and the vast unfenced areas of wheat and barley south of Calgary.

The miles and miles of straight roads. Must be a great problem travelling home late at night !

We were well looked after and taken to some wonderful places of historic and cultural interest relating to the First Nation people.

“Head Smashed-in Buffalo Jump” “Writing on Stone” “Frank Slide” Waterton National Park” Check these out on Google.

Other major tourist attractions visited were Mt St Helens, Mt Hood and Astoria where the Columbia River enters the Pacific Ocean. A meal with a Hutterite Colony.

The weather was perfect while away, we left NZ after the snow storm and arrived to 100 degree F.

All in all a great time was had by our Ambassadors. I am sure those of you who are planning to go on the exchange to Mexico and Costa Rica will also be in for a great treat.
